Social Eagle - AI: Buildathon:

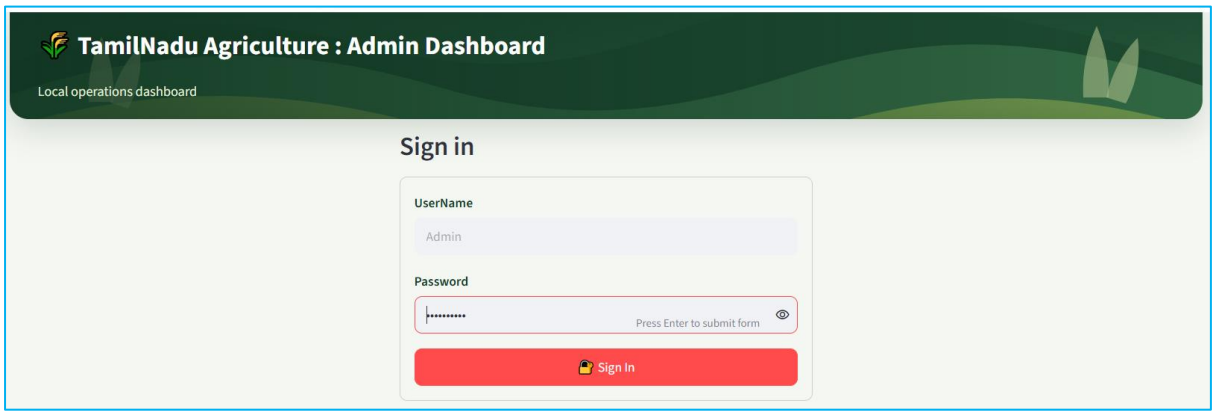

TamilNadu Agriculture Scheme Assistant: Test Results

Launching Admin Dashboard: (DATA LOADER + TEXT SPLITTER + EMBEDDING + DATA LOAD TO to VECTOR STORE)

```
python -m streamlit run apps\admin_dashboard.py --server.address 127.0.0.1 --server.port 8502
```

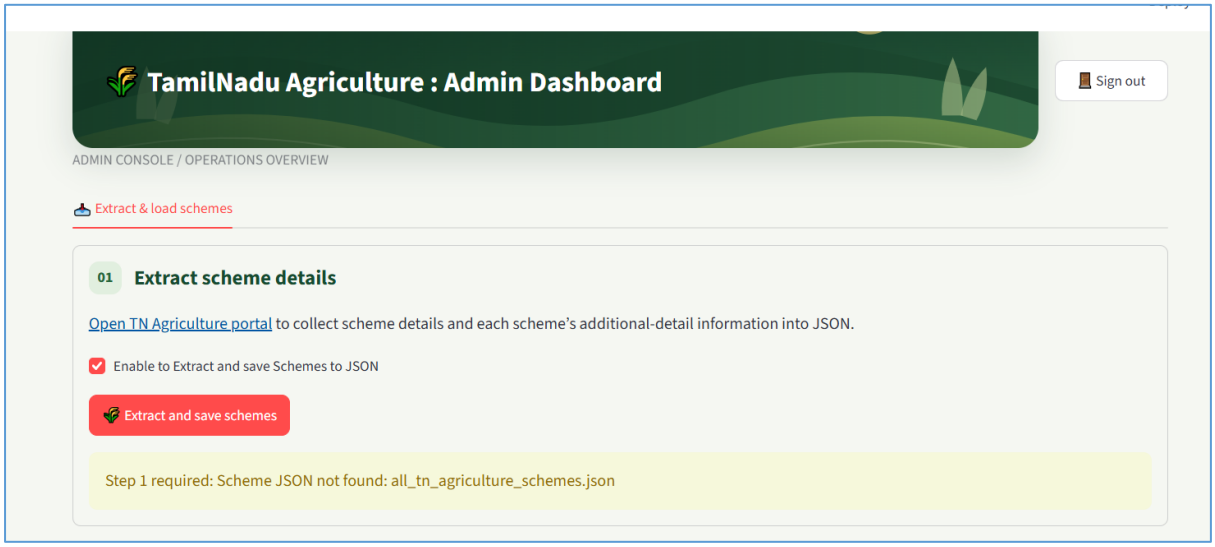

1. Sign In – Admin Dashboard

Note: Admin password should be configured in .env file with key **ADMIN_PASSWORD**=

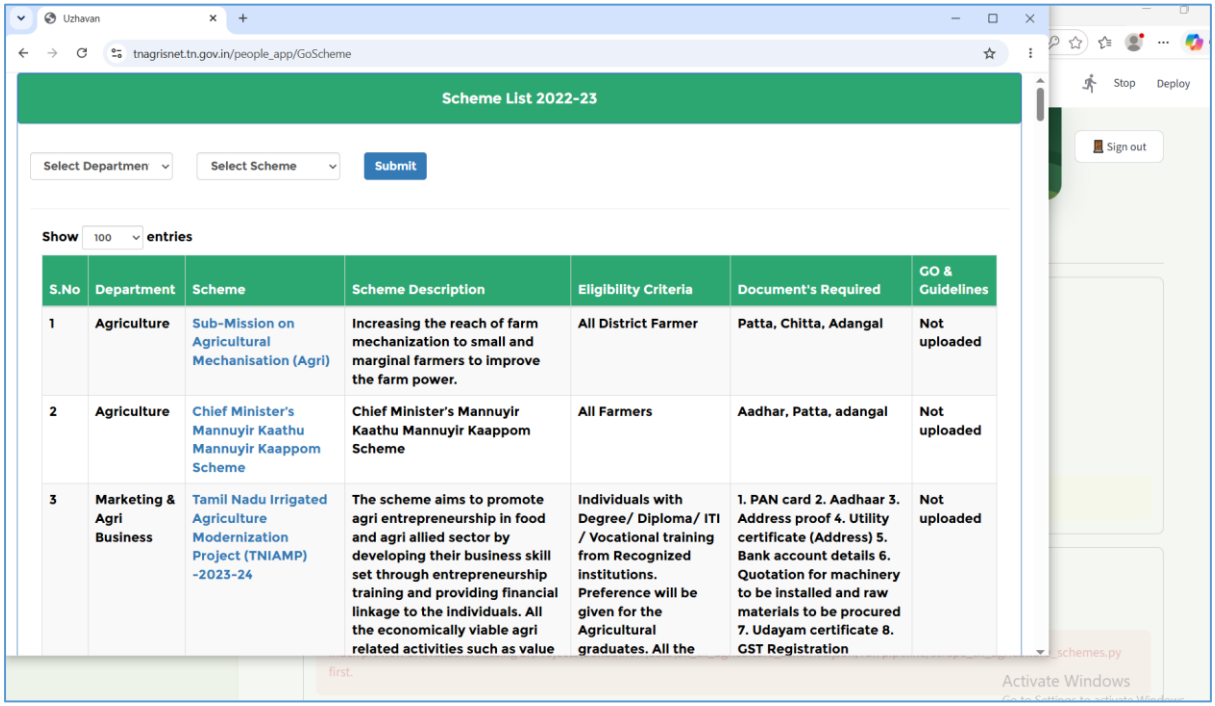

2. Run Step 01 : Extract scheme details

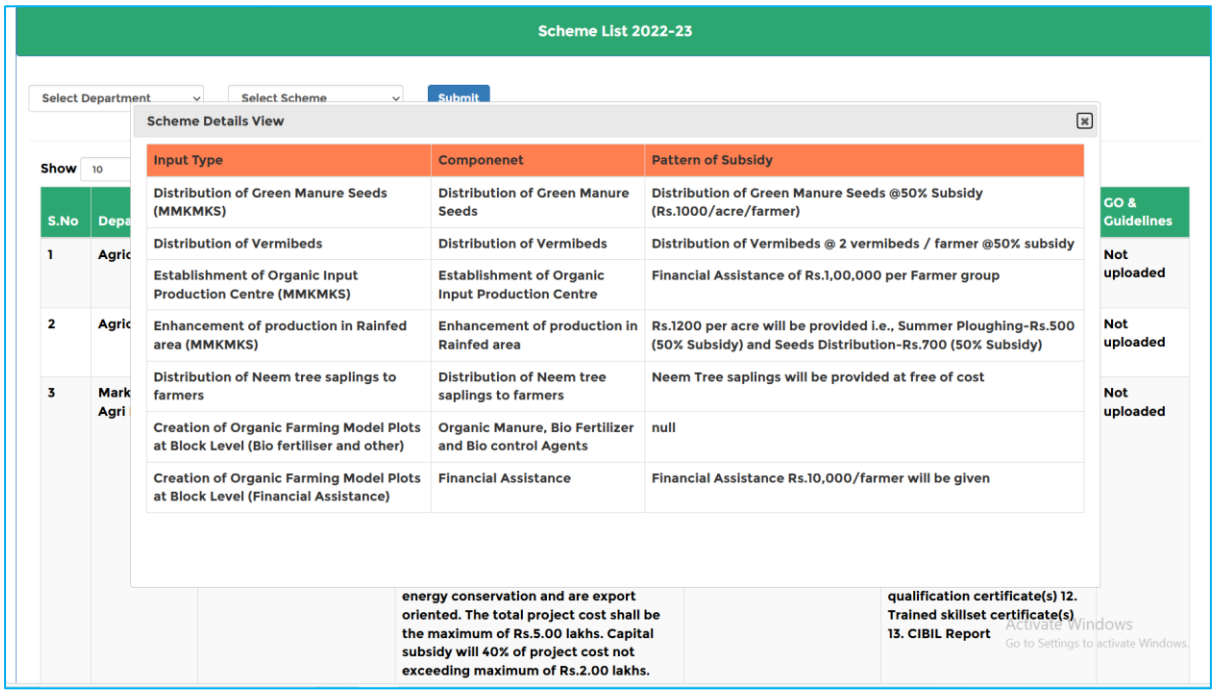

- Enable the check box and click on the button

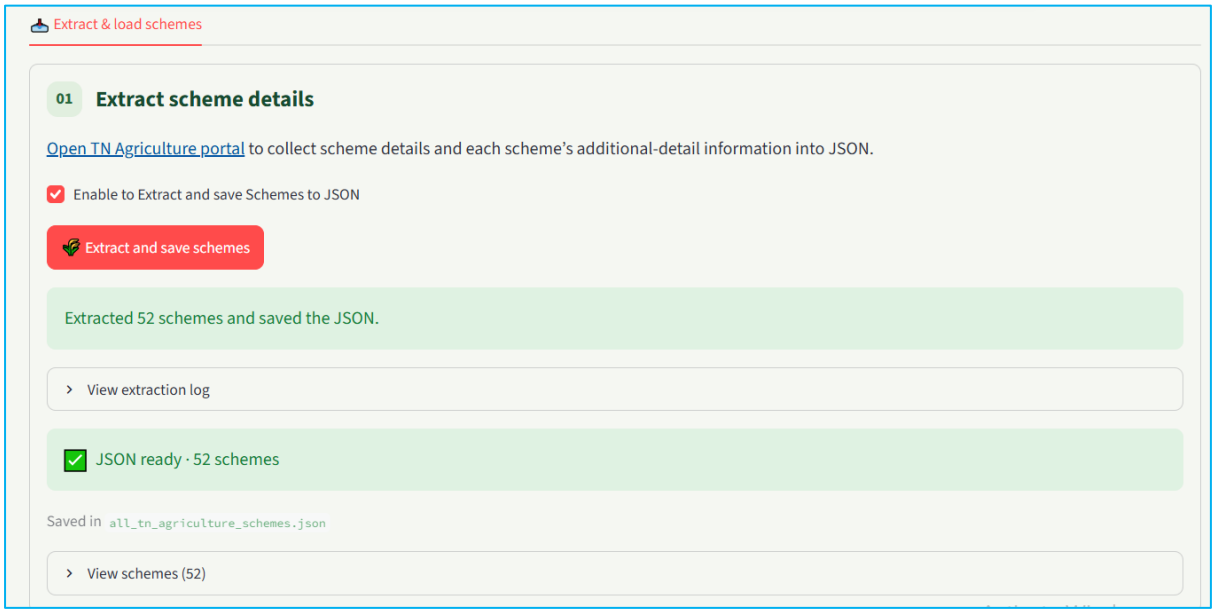

- Playwright launches TN Agri dashboard and uses beautifulsoup4 to scrap the web content

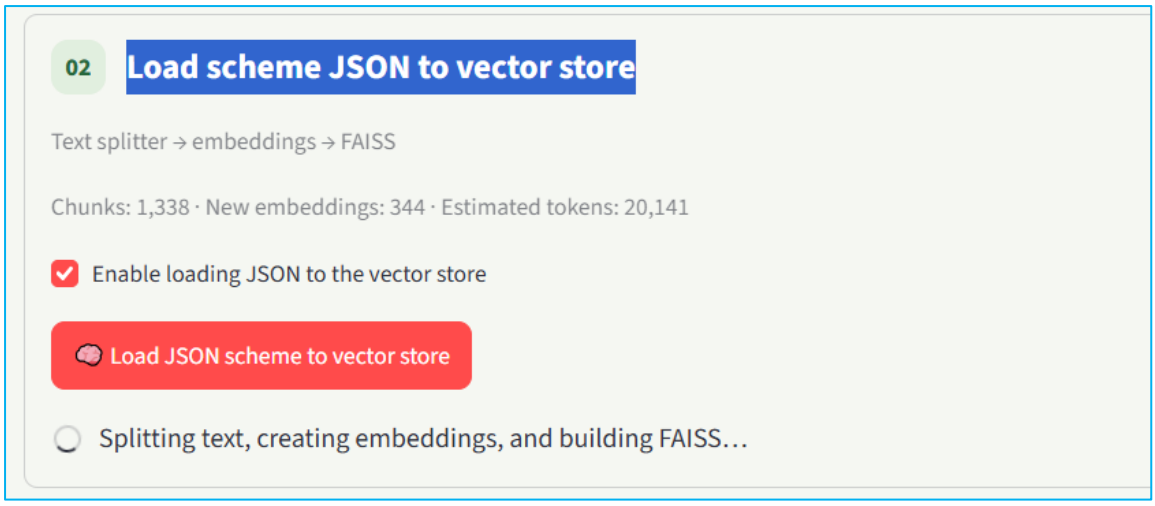

- Not only the main page content, script also launches individual Scheme links to scrap more information

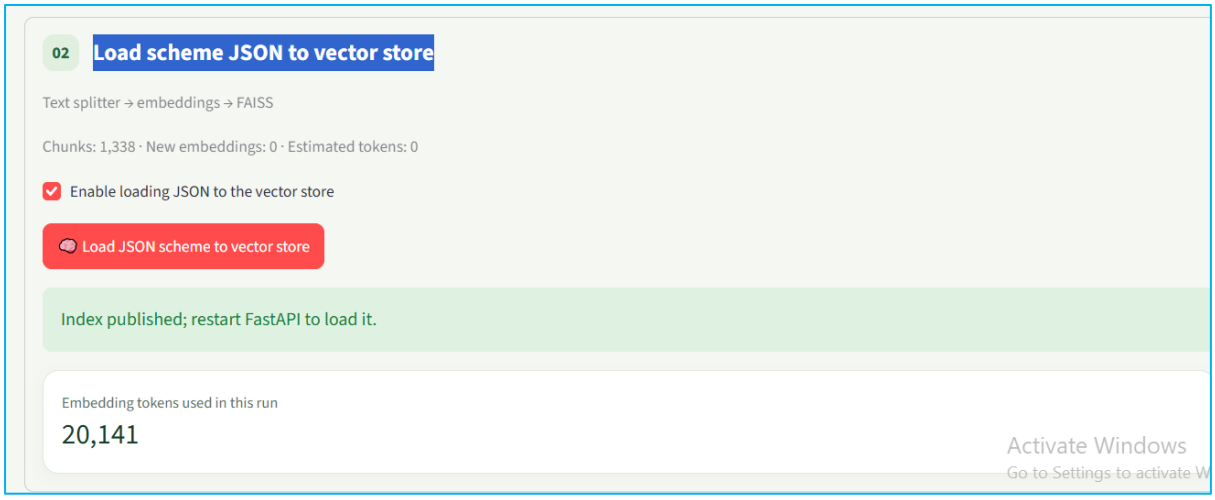

- Scrapped data loaded to the **all_tn_agriculture_schemes.json**

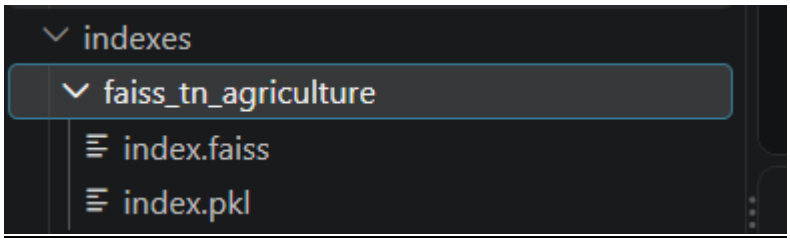

3. Run Step 02 : Load scheme JSON to vector store

Index Created in the source code

2. LAUNCHING TN AGRI CHAT FAST_API

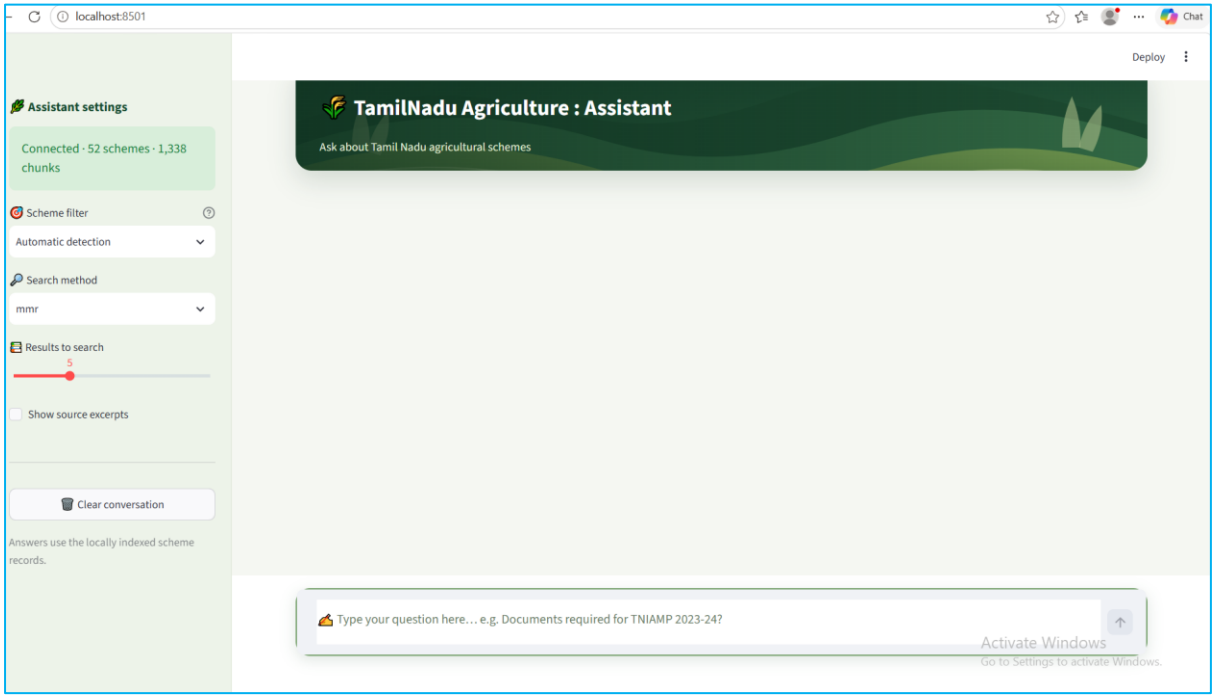

- Run the following command in new cmd terminal

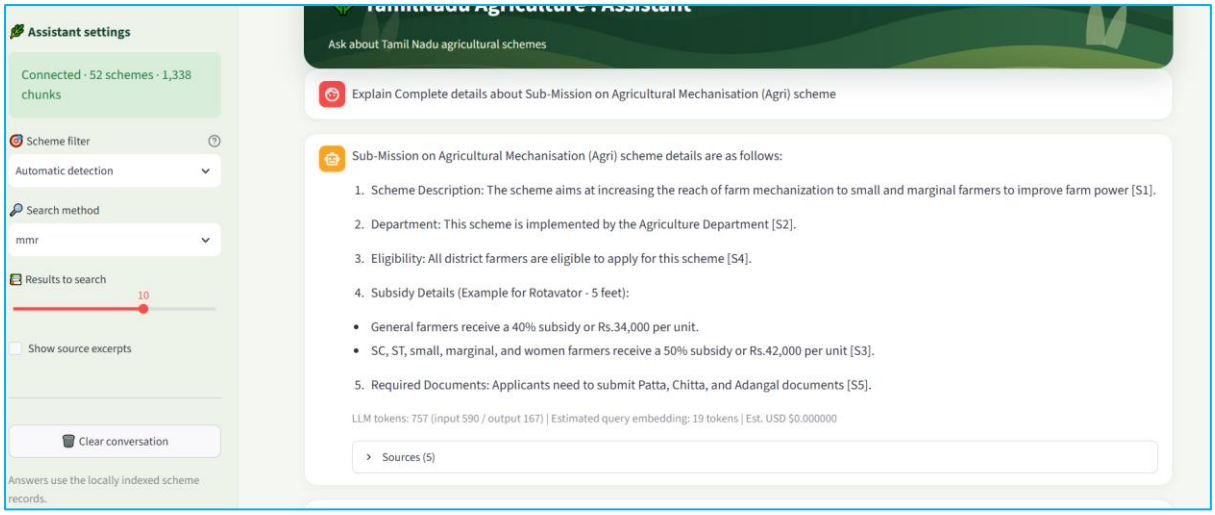

```
python -m uvicorn apps.chatbot_api:app --host 127.0.0.1 --port 8000
```

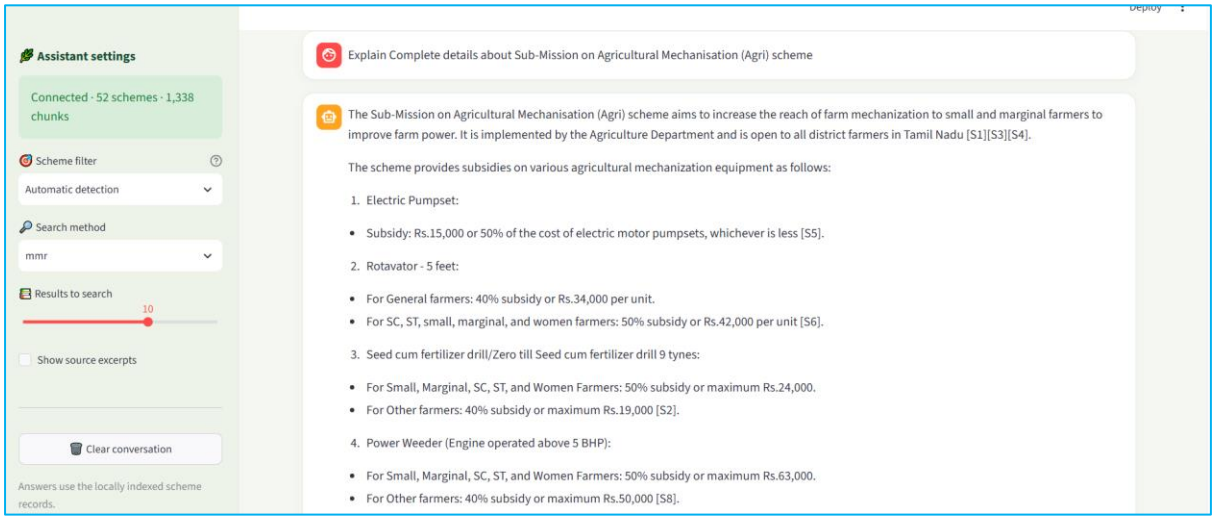

3. LAUNCHING TN AGRI CHATBOT UI (RETRIEVER + LLM Model Response Output)

- Run the following command in new cmd terminal

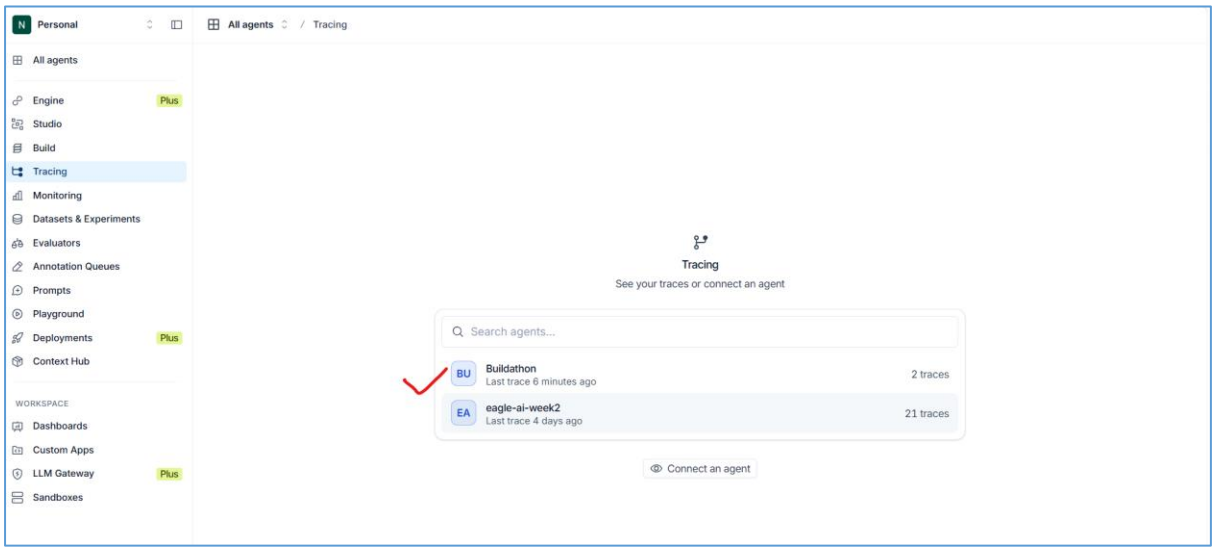

```
python -m streamlit run apps\chatbot_app.py
```
